

# Meet Vachhani

Surat, Gujarat

☎ +91-9601302727 | ✉ meetvachhani77@gmail.com | in LinkedIn | GitHub | Portfolio

## EDUCATION

### Vellore Institute of Technology

2022 – 2027 (Expected)

*Integrated M.Tech in Artificial Intelligence*

*CGPA: 8.08*

- Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, ANN, Data Structures & Algorithms, Probability & Statistics, Linear Algebra, DBMS

## TECHNICAL SKILLS

**Languages:** Python, SQL

**Backend Development:** REST APIs, JWT Authentication, OAuth

**Machine Learning & AI:** TensorFlow, PyTorch, Scikit-learn, Transformers (BERT), OpenCV, Yolo

**AI & LLM Systems:** RAG, LangChain, LangGraph (basic), Hugging Face Transformers, FAISS

**Data Analytics:** Pandas, NumPy, Matplotlib, Tableau, PySpark (basic)

**Cloud & DevOps:** AWS, Docker, Git, GitHub, Linux, Jenkins

## EXPERIENCE

### Python Backend Developer Intern

Surat, Gujarat

*House of PY Technologies*

*Oct 2025 – Jan 2026*

- Worked on backend development using Python and FastAPI, building and integrating REST APIs for internal ERP workflows.
- Wrote and optimized SQL queries in PostgreSQL for data handling, reporting, and automation tasks including WhatsApp daily report systems.
- Contributed to backend debugging, API testing, and database operations across multiple internal services.

### Data Analyst Intern – Exploratory Analysis & Predictive Modeling

Remote

*Elevate Labs*

*May 2024 – Jul 2024*

- Designed structured analytics dashboards and visualization pipelines for trend monitoring and stakeholder reporting.
- Analyzed and preprocessed large-scale Airbnb NYC datasets using feature engineering techniques to build a predictive price modeling system.
- Built a real-time Twitter sentiment analysis pipeline processing 10,000+ tweets via API ingestion and BERT-based transformer inference.

## PROJECTS

### Automatic Task Reminder System (ATRS) 🔄

May 2026

*Python, Flask, Groq API, Supabase, Firebase, REST APIs, HTML, CSS, JS*

- Built an AI-powered placement tracking system that automatically processes and classifies placement emails into structured event workflows.
- Developed an automated pipeline for email extraction, deduplication, scheduling, and real-time reminder management across placement updates.
- Integrated Gmail OAuth, push notifications, and REST APIs to deliver automated deadline alerts and event reminders with minimal manual intervention.

### JanSetu — AI-Powered Civic Grievance Management System 🔄

May 2026

*Python, FastAPI, LangChain, Groq API, Hugging Face, SQLite, JWT*

- Built an AI-powered civic grievance platform enabling citizens to submit, track, and manage complaints through dedicated citizen, officer, and admin portals.
- Implemented a background AI triage pipeline using Hugging Face BART-MNLI, CLIP, and LangChain agents for complaint classification, image verification, severity detection, and department routing.
- Integrated JWT authentication, SLA deadline tracking, lifecycle logging, and Twilio SMS to automate grievance handling and escalation workflows.

### Multi-Agent Self-Critique System

May 2026

*Python, LLMs, LangGraph, Async Workflows, Mistral-7B*

- Developing a multi-agent AI system where interconnected agents collaboratively review, critique, and refine generated responses through iterative reasoning workflows.
- Implementing asynchronous communication pipelines and evaluating performance on GSM8K, BoolQ, StrategyQA, and CLUTRR benchmarks to improve reasoning quality and logical consistency.
