SUMMARY

Integrated M.Tech AI student passionate about building AI-driven software products. Experienced in developing full-stack applications, LLM-powered workflows, computer vision systems, and scalable backend services using Python, FastAPI, React, PostgreSQL, and modern AI frameworks.

EDUCATION

Vellore Institute of Technology

2022 – 2027 (Expected)

Integrated M.Tech in Artificial Intelligence

CGPA: 8.12

- Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, ANN, Data Structures & Algorithms, Probability & Statistics, Linear Algebra, DBMS

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML, CSS

Backend: FastAPI, Flask, REST APIs, JWT Authentication, OAuth

Databases: PostgreSQL, SQLite, Supabase

AI & Machine Learning: PyTorch, Transformers, LangChain, LangGraph, Hugging Face, OpenCV, YOLOv8

Cloud & DevOps: AWS, Docker, Git, GitHub, Linux, Jenkins

EXPERIENCE

Python Backend Developer Intern

Surat, Gujarat

House of PY Technologies

Oct 2025 – Jan 2026

- Engineered and deployed REST APIs in Python and FastAPI, streamlining ERP operations across 3+ core business processes and reducing manual data entry overhead by an estimated 40%.
- Optimized PostgreSQL queries for reporting and task scheduling, including a WhatsApp digest system that delivered structured daily summaries to 10+ internal stakeholders with zero manual intervention.
- Diagnosed and resolved failure points across 5+ backend modules, stabilizing API reliability and restoring data integrity in production services.

Data Analyst Intern – Exploratory Analysis & Predictive Modeling

Remote

Elevate Labs

May 2024 – July 2024

- Built 4+ Tableau dashboards and visualization suites to surface business trends, replacing ad-hoc reporting with structured, repeatable insight delivery.
- Preprocessed and feature-engineered the Airbnb NYC dataset (50,000+ records) to train a regression-based price forecasting model, identifying key pricing signals across neighborhoods.
- Developed a high-throughput sentiment classification system ingesting 10,000+ tweets via API and scoring them through BERT-based transformer inference for live opinion monitoring.

PROJECTS

Sanjeevani AI | 🔗 Link

June 2026

Next.js, React, TypeScript, FastAPI, Groq API, YOLOv8, Supabase PostgreSQL, WebSockets

- Developed a full-stack emergency response platform with citizen and command-center applications supporting multimodal incident reporting (SOS, voice, text, image), real-time dispatch, and live operational dashboards.
- Implemented an AI-driven incident processing pipeline using Groq Llama 3.3 70B, Whisper, and YOLOv8 to classify emergencies, assign severity scores, recommend resources, and cluster duplicate reports using geospatial proximity.
- Built a resilient event-driven backend with FastAPI, Supabase Realtime, PostgreSQL, IndexedDB offline queuing, SMS fallback, and Bluetooth mesh relay simulation for uninterrupted emergency communication.

Automatic Task Reminder System (ATRS) | 🔗 Link

April 2026

Python, Flask, Groq API, Supabase, Firebase, REST APIs, HTML, CSS, JavaScript

- Architected an LLM-powered email processing pipeline using Flask and Groq API to parse, classify, and organize 100+ placement communications into structured scheduling events.
- Automated deadline management through a scheduling engine that synchronized placement milestones with calendar events and push notifications, reducing manual tracking by 3+ hours per week.
- Integrated Gmail OAuth, Firebase Cloud Messaging, Supabase, and REST APIs to deliver real-time reminders across web and mobile platforms without manual intervention.

- Developed a three-portal grievance management system for citizens, officers, and administrators, supporting secure complaint tracking across the complete resolution lifecycle.
- Integrated LangChain agents with BART-MNLI zero-shot classification and CLIP image verification to automatically categorize, validate, and prioritize complaints across 8+ government departments.
- Implemented JWT authentication, SLA breach monitoring, Twilio SMS escalation, and immutable audit logs to improve accountability and streamline grievance resolution.

LEADERSHIP & EXTRACURRICULAR

- Operational Manager – AI Club, VIT
- May 2025 – Apr 2026
- Oversaw club operations, coordinated cross-functional teams, and executed workshops, competitions, and technical initiatives.
- Smart India Hackathon (SIH) – Internal Round Qualifier
- Aug 2024 – Nov 2024
- Qualified through the internal selection round among 500+ competing teams at VIT.
